Says

What have we heard them say?
What can we magine them saying?

IOTsmart farming solution is a system (ie) built for monitoring the occupied with the crop field ,with the help of sensor light, humidity, tempreture soil moisture ,crop health.

Node -Redframers can contorl the water regulations based on realtime. IBM cloudant to help farmers use less water anddevelop a new smart irrigation solution.

Mobile application also enable the farmers to grow better crops.

The compounds used are Sensors, Camera Multiple devices combined to do the task

Cloud is used for large database storage

In the programming languages used are Java adding database and store details

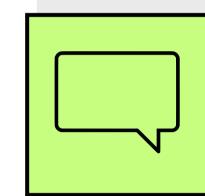

What are their wants, needs, hopes,

and dreams? What other thoughts

might influence their behavior?

Thinks

Using arduino board to monitor from pests and also keeps updating the owner

Give them a name and a portrait to empathize with your persona.

Using
Nodered we
connect IOT
devices
together

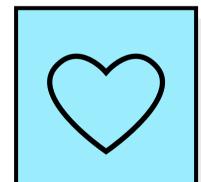

Cloud IOT
simplifies the
process of
Communication
and Transfer data
between IOT
devices

Mobile applications will be using to manage the

ropes in

agriculture

Mobile app can use the Cloud IOT for delivering the large scale action

IOT is tightly bound to cyber-Physical systems and enables smart infrastructure

IOT based maintenance allows to systematically schedule the optimal maintenance

Accelerated tendencay towards mobility of devices, either by humans or by using mobile itself, like a robot or a UAN

Feels

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?

Does

What behavior have we observed? What can we imagine them doing?
